Margo,

This letter serves to inform you that the product(s) identified below have been reviewed by the Vermont Agency of Transportation (VTrans) Materials & Research Section and the appropriate Subject Matter Experts (SMEs). Based on this evaluation, the following product(s) have been approved for inclusion on the VTrans Approved Products List (APL) under the corresponding specification(s).

| <b>Trade Name</b>          | <b>Specification Number and Description</b> |
|----------------------------|---------------------------------------------|
| FODS Trackout Control Mats | 755.15 Trackout Mats                        |

VTrans reserves the right to remove any product(s) from the APL at its sole discretion, without prior notice, if such action is determined to be in the best interest of the Agency.

Additional information regarding the VTrans Approved Products Program, including the current APL, is available on the VTrans webpage: <https://vtrans.vermont.gov/highway/construct-material/test-cert/certification/approved-products-and-advanced-certifications>.

Please note that VTrans no longer requires annual product recertification. However, manufacturers are required to notify VTrans immediately of any changes to approved product(s), including, but not limited to their design, formulation, composition, name, test properties, and manufacturer as previously approved. VTrans will evaluate the scope of reported changes and notify the authorized representative of any actions required or taken. Failure to notify VTrans of such changes may result in the removal of your product(s) from the VTrans APL.

Approval for inclusion on the VTrans APL does not constitute an endorsement of the product(s) and shall not be used for advertising, marketing, or other promotional purposes.

Future correspondence regarding the VTrans Approved Products Program may be sent via email to [aot.materialscertifications@vermont.gov](mailto:aot.materialscertifications@vermont.gov).

Sincerely,

*Philip Peloquin*

Philip Peloquin, Quality Assurance Manager  
Construction & Materials Bureau, Materials & Research Section
